smart electric tugs

Scan the QR code to watch the Eurobin tug video.

## Food & Pharma

DIN 9797 stainless steel Eurobins are widely used in the food industry. Moving these bins is time-consuming and not ergonomically sound for employees. Movexx therefore developed the Eurobin tug (TT1000-M-Inox-EB).

Employees can move the Eurobins with an optimal working position (upright), significantly reducing physical strain. This benefits employees' productivity and job satisfaction, among other things.

By using the coupler, several bins can be transported at the same time, which leads to greater efficiency.

Interested? Or would you like to see what this machine can do for you, please request a on site demonstration.
